Kinship, affinity, and domestic group : a study among the

Over its history, anthropology has developed a number of related concepts and terms in the study of kinship, such as descent, descent group, lineage, affinity/affine, consanguinity/cognate and fictive kinship. Further, even within these two broad usages of the term, there are different theoretical approaches.

Kinship - Wikipedia

In law and in cultural anthropology, affinity, as distinguished from consanguinity (blood relationship), is the kinship relationship that is created or exists between two or more people as a result of someone's marriage.

Affinity (law) - Wikipedia

Kinship controls social relationships among African people, and since there are different kinds of kinship terms to express the different kinds of relationship between persons, knowing the kind of kinship relationship that unites one with the other is of paramount importance.

Kinship in African Philosophy and the Issue of Development

Incorporating violence into an analysis of kinship further highlights the lived interactions of individuals rather than static structures of kinship. [gender, power, domestic violence, marriage, kinship, Andes, Latin America]

The intimacies of power: rethinking violence and affinity

This thesis is concerned with the ways in which kinship and friendship are informed by cultural notions of gender in two villages of Northern Lesbos (East Aegean region of Greece) and it falls into four parts. It begins with a discussion of marriage and the creation of the domestic group, it moves on to consider relations in the predominantly ...
